Accuratus WP127 V2 - USB & PS/2 Full Size IP54 Flexible Roll Up Silicone Keyboard with High Visibility Key Legends

About

The WP127 V2 is a flexible silicone based Keyboard which is ideal for dirty, dusty and wet environments and can withstand most things you throw at it!

It's made of a high quality silicone material which offers the perfect combination of practicality, durability, comfort and flexibility. The unique material allows you not only to clean the keyboard with soap and water, but makes it resistant to any dirt, dust, sand and even coffee or tea spills! Simply wipe up the spilled liquid with a damp cloth and continue working.

The WP127 V2 is based on the popular original WP127 but with a complete redesign and improved features. The internal membrane and keys have been fully redesigned so that they are more responsive with an improved tactile feel, more positive key feedback and improved lifespan.

The WP127 V2 is suited for many environments... car garages, warehouses, in vehicle computer systems, workshops, factories, laboratories, food environments, boats, the list goes on.
